# Project Brief: Title

Project Creator: <Name>

## Overview

*Summarize what's been built and what purpose it serves.*

## Tech Stack

*Please list the tech stack for the project.*

- 

## Implementation

*Describe the steps you took to implement your project, including technology choices, and factors that may have come into play when you took on the project. If this was a group project, please describe only what you implemented on the project.*

## Key Decisions

### Technologies

*Please describe why you chose the tech stack that was used for the project, alternatives that you considered, and what impacted your decisions.*

## Hits & Misses

*Please give 3 things that went well on the project, or things you are proud of. Then, list 3 things that were issues or hurdles in your project, or that you wish you could do differently.*
